CSS

## Fundamental HTML Tags

Below you will find explanations and examples of some essential tags in HTML

### Table of contents

- [Headers](#)
- [Links](#)
- [Images](#)
- [Forms](#)
- [Tables](#)

## 1. <h1> and <h2> Tags — Structure

Header tags allow you to organize the hierarchical structure of a web page

```
<h1>Welcome to my page</h1>  
<h2>About me</h2>
```

**Welcome to my page**

**About me**

## 2. <a> Tag — Links

creates a hyperlink to another website, document, or internal section

```
<a href="https://www.google.com" title="Ir a Google">
```

Go to Google

</a>

[Go to Google](#)

### 3. <img> Tag — Images

Inserts images into the page. It does not have a closing tag

```

```

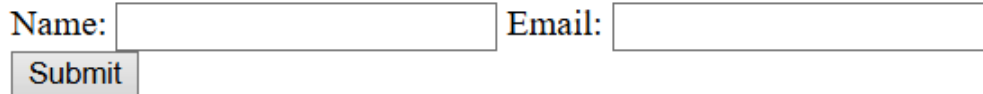

More information: [W3Schools — <img> Tag](#)

## 4. <form> Tag — Forms

Allows sending data to the server

```
<form action="process.php" method="post">  
  <label>Name:</label>  
  <input type="text" name="name">  
  
  <label>Email:</label>  
  <input type="email" name="email">  
  
  <input type="submit" value="Submit">  
</form>
```

## 5. <table> Tag — Tables

Organizes data into rows and columns

```
<table border="1">  
  <tr>  
    <th>Product</th>  
    <th>Price</th>  
  </tr>  
  <tr>  
    <td>Chocolate</td>  
    <td>2€</td>  
  </tr>  
</table>
```

Product	Price
Chocolate	2€
